

MASER ENGINEERING

Travillons ensemble

YOUR AIRPORT PARTNER

Maintenance/New Works/Metalwork

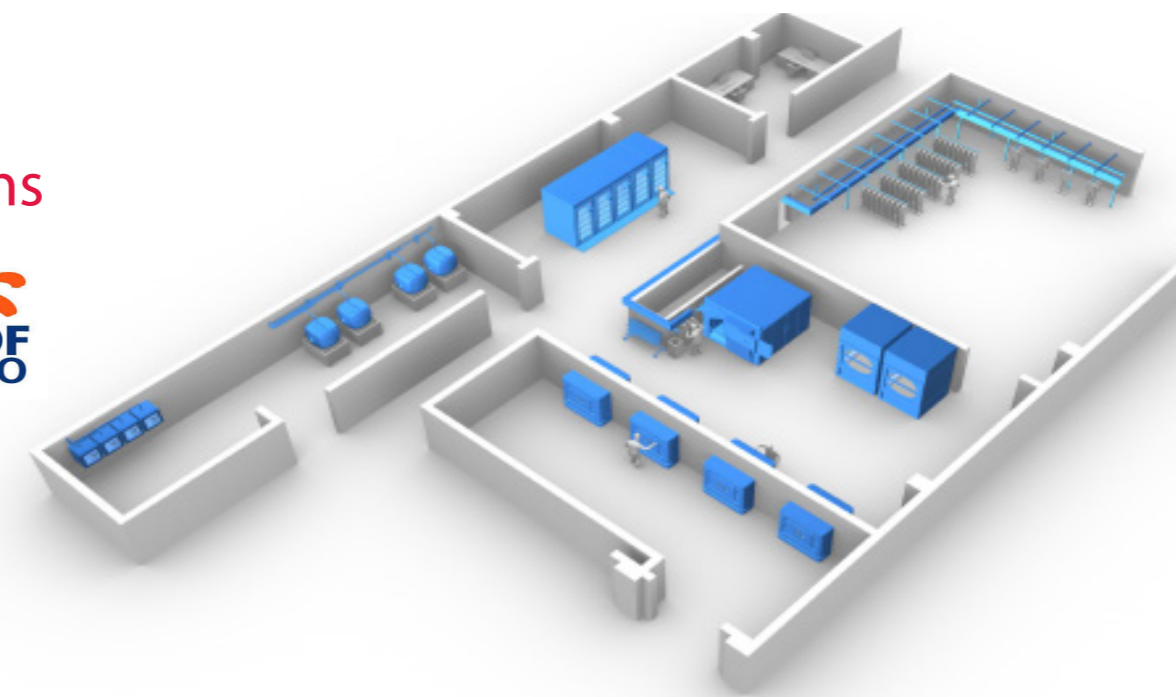

What we do offer?

More than 10 years' experience in the nuclear sector has allowed Maser Engineering to develop a **tailor-made offer** of services associated with new works, maintenance and installation and equipment engineering

We support you throughout your improvement projects: from the search for solutions, to the design through to the commissioning of the installations and the preventive and corrective maintenance of the equipment.

CEFFRI certified and **EDF UTO** qualified (Industrial Logistics Maintenance Qualification), Maser Engineering guarantees technical expertise that meets the requirements of your environment. To support this process, Maser Engineering makes sure that each of its employees has specialized skills in ionizing environments, legislation, risk prevention, and the application of safety rules.

Our certifications

Study & Engineering

Our team offers engineering consultancy services to support you in defining, implementing, controlling and optimizing your processes and production assets
Production resource layout

- *Health and performance study: Ergonomic expertise of installations and production process optimization*
- *Definition of maintenance strategies*

Maintenance

Our team develops maintenance sequences and provides preventive, corrective and improvement maintenance of your equipment:

Development of maintenance sequences

- *Preventive and corrective maintenance*
- *Laundry equipment*
- *Workshop machine tools (lathes, milling machines,...)*
- *Pressure differential devices and MED (requalification)*
- *MWTP (Mobile Wastewater Treatment Plant)*

Dismantling and associated sorting

Using consultancy we guarantee the conformity of dismantling activities and also provide the tracking and control of your radioactive and conventional waste. In addition, we offer the dismantling of your equipment (disassembly, sizing, sorting and packaging of waste).

Equipment dismantling:

- *Dismantling*
- *Sizing*
- *Packaging*
- *Consultancy, Monitoring, waste sorting checks*

New works

Thanks to its experience in the installation of your production resources, particularly in controlled areas (washing facilities), Maser Engineering provides the associated custom-made equipment and furniture.

Supply and installation of equipment

- *Laundry room*
- *Workshop machine tools*
- *Retrofit on existing equipment*
- *Industrial transfer*
- *Supply and installation of custom-made furniture in and outside controlled zones*

Customer testimonials

“

We asked Maser Engineering to renew our washing machines (purchase of a 90kg machine) and to carry out the preventive maintenance of our laundry equipment: rotary dryer, washing machine, finishing tunnel, etc. We are satisfied with the quality of the service and the expertise of the technician, who knows the equipment very well. In addition, the Maser Engineering team is a source of proposals for improving laundry operations.

”

Colette MARTINOT, Laundry - Gas Project Manager
EDF - CNPE de Paluel

“

We had maintenance and troubleshooting related needs for our test machines. We are satisfied with the Maser Engineering team, which is available and responsive during interventions requiring specific and varied skills (hydraulic, electric, regulation, measuring equipment, IT, etc.).

”

Christel CAËS, Mechanical materials specification engineer
CEA (French Nuclear Research Center), Saclay

About

Us

Partner of the biggest groups in all sectors of industry, in 40 years, Maser Engineering has become a reference in engineering, new works, industrial maintenance and industrial training

A strengthened QHSE policy makes it possible for Maser Engineering to improve its performance, optimize costs and guarantee the sustainability of its customers' activities in compliance with legislation covering workplace health and safety, the environment and diversity.

45 years
of expertise

300
active clients

600
employees

51,1 M€
of revenue in 2018

Maser Engineering is a subsidiary of the CRIT Group, which is a major Human Resource, Airport Assistance, Engineering and Industrial Maintenance player

Our Team

Our teams of experienced engineers and technicians work in France and internationally.
